

Sinclair & Rush, Inc.

Product Protection Specialists

Sinclair & Rush, Inc.

With over 60 years of experience, Sinclair & Rush has grown to become the worldwide leader in product protection solutions. We attribute this success to our family of companies all representing the common ideal of supplying high-quality protective coverings for a wide range of industries and markets. Additionally, all Sinclair & Rush companies are committed to providing the best in customer service through help with product selection, ease of ordering and post-sale attention. We will partner with you to select the best product protection solution for your application.

"Great products at a fair price. Easy online shopping and fast shipping. I will be a return customer. Thanks" - Nathan from Texas "Customer service was wonderful. Couldn't be any happier. Shipping was fast." - Kelly from Colorado "Extremely fast shipping!" - Nathan from Tennessee "Great company, people and products." - Danny from Georgia "Superb service!" - Robert from Utah "I checked other sites and this was the best price for the product. Service was excellent, friendly and quick delivery!" - Carol from Tennessee "Good company enjoyed doing business with them." - Robert from Michigan "GREAT SERVICE THANKS." - Bob from Arizona "Good customer service." - Larry from Georgia "They did an excellent job in fulfilling my order." - Jeffrey from Mexico "Super friendly on the phone and was great in helping out." - Cam from Canada "Excellent value. Quality products." - Jeffrey from Indiana "Customer service was excellent. Thank you." - Rita from Canada "Great customer service.. Thank you." - Eric from Virginia "Great decision with a company that I can rely on. I placed it and was very satisfied. She explained. Great job." - Julie from California "Very understanding to our needs, polite and professional. Thank you so much for what she said she would do." - Julie from South Carolina "Fast and prompt response." - Johanna from Ohio "Chris was very helpful and professional. The company and products are in an excellent way." - Don from Indiana "Everything was handled perfectly." - Don from New Jersey "Caps I ordered are PERFECT. They make my children's products safer and more professional looking." - Margie from Wisconsin "Very friendly service and easy to work with" - Logan from Wisconsin "Always a pleasure working with StockCap staff. Thank you for the great service from Wisconsin" "Was very Happy with service and ease of ordering through your website and quick shipping. Thank-you" - Jacquelin from Michigan "A pleasant experience." - Don from California "After working with S&R for over 20 years, I always find the transaction to be smooth and friendly. Thank you." - Dean from New York "My total experience was excellent! Thank you!" - Gordon from South Carolina "Thanks for having a dedicated team of professionals providing the upmost customer services with an overall sense of urgency. Who also provided cost free samples to ensure correct items were ordered. Very, very impressed!" - Rick from Washington "THIS WAS THE FIRST TIME DEALING WITH YOUR COMPANY. I'M IMPRESSED!" - Kerry from Georgia "StockCap has always treated me with a great deal of respect and have always worked to provide me with whatever I needed." - Brett from Alabama

Manufacturing Processes and Custom Applications

Sinclair & Rush, Inc. is a multi-process manufacturer, a benefit for end users. Our custom capabilities abound with the depth of our five processing options. In addition, our brands complement each other, often reducing the end users search for multiple sources.

- All brands are supported by our in-house engineering team based on nearly 70 years of experience in the industry
 - No need to struggle over which process or part to choose; our engineers will analyze and help guide you to the right solution
 - Present your concept and let our engineering team design a part to fit your requirements
- A strong relationship with our raw material suppliers yields economical, high quality materials
 - Scrap from one process is often available for other processes, saving costs with an environmental benefit
- Reduce administrative costs with a single supplier of a variety of components

Complimenting these options is our expansive inventory of stocked items, many available for direct purchase from our websites.

Vinyl Dip Molding

- Prototype samples and quotes are completed quickly and inexpensively
- Variety of material durometers, textures and colors
- Multi-color and multi-texture capabilities
- A single diameter produces varying lengths with no additional tooling charges
- High temperature resistant materials
- Many styles of caps, plugs, flange covers, hose guards, grips and tubing
- Soft and flexible material allows for snug fitting caps and plugs

Injection Molding

- Low tooling costs and inexpensive prototypes
- Wide variety of material durometers and colors
- Tight tolerances for complex parts
- Plastic and rubber materials
- Design and mold most thermoplastics
- Other materials include silicone, EPDM, Neoprene, and natural rubber

To view the full range of products offered, please visit our website or call for a free consultation.

Extrusion

- Economical and highly efficient process
- Largest selection of sizes (diameters and lengths) and wall thicknesses
- Easily recycled
- Materials include PETG, propionate and PVC (clear tubing), EPDM and NPVC (foam tubing) and PVC (vinyl tubing)
- Plastic tubing is easily converted to tube containers, typically used in packaging
- Foam tubing is used to produce foam hand grips in a variety of styles

Thermoforming

- Cost-effective customization
- Great design flexibility
- Inexpensive molds
- Secures product for added protection
- Nesting feature lowers costs on shipping and storage
- All common materials including PET, PVC, PETG & styrene are available

Rubber Molding

- Compression, Transfer or Injection molding processes
- Tooling costs and tolerances vary by process, which is often determined by volume needed
- Well-suited for rubber to metal bonding
- Excellent for masking processes as material is capable of withstanding high temperatures
- Material does not contaminate paint lines and can often be reused
- Materials include silicone, EPDM, Neoprene, Nitrile (NBR), Hypalon, SBR, Viton and natural rubber

SECONDARY OPERATIONS:

Here is a perfect opportunity to build brand awareness. Add a label or print your logo directly on your cap, plug, grip or tube and be seen every time your product comes in contact with a human. Silkscreen and pad printing are our most popular methods for printing. Or, punch a hole, slice an end, request an industrial wash and even let us package the product based on your requirements. Our Secondary Operations are always in demand for these popular design options.
